

# Table of Contents

<b>Preface</b> .....	ix
<b>Acknowledgements</b> .....	xi
<b>Part I Introduction</b> .....	1
<b>1 Greenhouses, Plants &amp; Mites</b> .....	3
1.1 Introduction .....	3
1.2 Greenhouses .....	3
1.3 Plants grown in greenhouses .....	5
1.4 Mites in greenhouses .....	6
1.5 Recommended further reading .....	9
1.6 References cited .....	10
<b>2 Introduction to Acari</b> .....	11
2.1 General introduction .....	11
2.2 Morphology and structure .....	12
2.2.1 Division of body .....	12
2.2.2 Gnathosoma .....	13
2.2.3 Idiosoma .....	15
2.2.4 Legs .....	17
2.3 Classification .....	18
2.3.1 Higher classification .....	18
2.3.2 Order Prostigmata .....	23
2.3.3 Order Mesostigmata .....	27
2.3.4 Order Astigmata .....	29
2.4 Recommended further reading .....	29
2.5 References cited .....	30
<b>3 Methods &amp; Techniques</b> .....	33
3.1 Collecting mites .....	33
3.1.1 Collecting mites from plants .....	33
3.1.2 Collecting mites on/in substrate .....	36
3.1.3 Things to note when collecting .....	36

3.2 Preserving mites for study .....	37
3.3 Preparing mites for microscopic study .....	37
3.3.1 Clearing/maceration of specimens .....	37
3.3.2 Temporary mounts .....	38
3.3.3 Permanent mounts .....	39
3.3.4 Recommended further reading .....	42
3.4 Rearing mites .....	42
3.5 References cited .....	42
<b>Part II Pest Mites .....</b>	<b>45</b>
<b>4 Spider Mites .....</b>	<b>47</b>
4.1 Introduction .....	47
4.2 Morphological characters .....	47
4.3 Life history and biology .....	48
4.4 Species important in greenhouses .....	50
4.4.1 <i>Tetranychus urticae</i> (Koch) .....	54
4.4.2 <i>Tetranychus cinnabarinus</i> (Boisduval) .....	61
4.4.3 Other spider mites .....	64
4.5 References cited .....	75
<b>5 False Spider Mites .....</b>	<b>87</b>
5.1 Introduction .....	87
5.2 Morphological characters .....	87
5.3 Life history and biology .....	88
5.4 Species important in greenhouses .....	90
5.4.1 <i>Brevipalpus obovatus</i> Dannadieu .....	90
5.4.2 <i>Brevipalpus phoenicis</i> (Geijskes) .....	93
5.4.3 Other species .....	96
5.5 References cited .....	97
<b>6 Tarsonemid Mites .....</b>	<b>99</b>
6.1 Introduction .....	99
6.2 Morphological characters .....	99
6.3 Life history and biology .....	100
6.4 Species important in greenhouses .....	101
6.4.1 <i>Polyphagotarsonemus latus</i> (Banks) .....	104
6.4.2 <i>Phytonemus pallidus</i> (Banks) .....	109
6.4.3 Other tarsonemid species .....	114
6.5 References cited .....	121
<b>7 Eriophyoid Mites .....</b>	<b>127</b>
7.1 Introduction .....	127
7.2 Morphological characters .....	127

---

7.3 Life history and biology	128
7.4 Species important in greenhouses	128
7.4.1 <i>Aculops lycopersici</i> (Masse) . . . . .	129
7.4.2 <i>Epitrimerus alinae</i> Liro . . . . .	133
7.4.3 Other eriophyoid mites . . . . .	135
7.5 References cited . . . . .	137
<b>8 Acarid Mites</b> . . . . .	<b>141</b>
8.1 Introduction . . . . .	141
8.2 Morphological characters . . . . .	141
8.3 Life history and biology . . . . .	142
8.4 Species important in greenhouses . . . . .	142
8.4.1 <i>Rhizoglyphus robini</i> (Claparède) . . . . .	147
8.4.2 <i>Rhizoglyphus echinopus</i> (Fumouze and Robin) . . . . .	149
8.4.3 <i>Tyrophagus</i> species . . . . .	151
8.4.4 <i>Mycetoglyphus fungivorus</i> (Oudemans) . . . . .	158
8.5 References cited . . . . .	158
<b>9 Other Pest Mites</b> . . . . .	<b>163</b>
9.1 Introduction . . . . .	163
9.2 Siteroptidae . . . . .	163
9.3 Penthaleidae . . . . .	165
9.4 Tydeidae . . . . .	166
9.5 Tuckerellidae . . . . .	166
9.6 Oribatida . . . . .	167
9.7 References cited . . . . .	168
<b>Part III Beneficial Mites</b> . . . . .	<b>169</b>
<b>10 Phytoseiid Mites</b> . . . . .	<b>171</b>
10.1 Introduction . . . . .	171
10.2 Morphological characters . . . . .	171
10.3 Life history and biology . . . . .	172
10.4 Species important in greenhouses . . . . .	173
10.4.1 <i>Phytoseiulus persimilis</i> Athias-Henriot . . . . .	180
10.4.2 <i>Neoseiulus cucumeris</i> (Oudemans) . . . . .	186
10.4.3 Other phytoseiid species . . . . .	189
10.5 References cited . . . . .	194
<b>11 Laelapid Mites</b> . . . . .	<b>203</b>
11.1 Introduction . . . . .	203
11.2 Morphological characters . . . . .	203
11.3 Life history and biology . . . . .	204
11.4 Species important in greenhouses . . . . .	204

---

11.4.1 <i>Hypoaspis aculeifer</i> (Canestrini) .....	204
11.4.2 <i>Hypoaspis miles</i> (Berlese) .....	206
11.4.3 Other laelapid species .....	208
11. 5 References cited .....	208
<b>12 Other Beneficial Mites</b> .....	<b>211</b>
12.1 Introduction .....	211
12.2 Mesostigmata .....	211
12.2.1 Parasitidae .....	211
12.2.2 Ascidae .....	212
12.3 Prostigmata .....	213
12.3.1 Stigmaeidae .....	213
12.3.2 Anystidae .....	214
12.3.3 Cunaxidae .....	214
12.3.4 Erythraeidae .....	215
12.3.5 Tydeidae .....	216
12.4 References cited .....	216
<b>Part IV Accessories</b> .....	<b>219</b>
<b>13 Glossary</b> .....	<b>221</b>
<b>14 Appendix: Mite Information Sources</b> .....	<b>229</b>
14.1 Introduction .....	229
14.2 Professional societies/organizations .....	229
14.3 Serial publications .....	231
14.4 Directories of acarologists .....	233
14.5 Internet resources .....	233
14.6 Acarological collections .....	234
14.7 Acarology courses .....	234
14.8 Suppliers of natural enemies for biological control .....	234
<b>15 Index</b> .....	<b>235</b>
