Statement on Slavery and Human Trafficking
2021-22

Introduction

The Natural History Museum is a world-class visitor attraction and leading science research centre. Our vision is of a future where both people and planet thrive and our mission is to create advocates for the planet. One of our five strategic priorities is to create a resilient and sustainable organisation and the way in which we acquire goods, services and works forms a significant part of that challenge.

This Statement is designed to satisfy the requirements of Section 54 of the Modern Slavery Act 2015, by informing our visitors, partners, suppliers, staff and the public about the Museum’s policy with respect to modern slavery, human trafficking, forced and bonded labour and labour rights violations in its supply chains and the steps taken to identify, prevent and mitigate the risks. This is the Museum’s sixth annual statement to be published under the Act.

In our 2020-21 Statement, we set out what we did during the year to address the risk of human rights abuses in our supply chains and what we plan to do in the future. This year’s Statement will show how we have moved that agenda along during the year 2021-22.

Our organisation

Managing the Museum’s non-retail supply chains is the direct responsibility of the Procurement Manager, who reports to the Executive Director of Finance and Corporate Services and thence to the Museum Director and the Board of Trustees.

Supply chains of goods for resale are the responsibility of the Head of Retail, who reports to the Director of Commercial and Visitor Experience and thence through the Executive Director of Engagement to the Museum Director and the Board of Trustees.

During 2021-22, the Museum spent in excess of £33m on goods, services and works, from a total expenditure of £85m.

Our policies in relation to slavery and human trafficking

The Natural History Museum is committed to the highest standards of ethical conduct in our activities. Ethics are an essential part of decision-making and of ensuring proper and transparent administration. The Museum’s Code of Ethics sets out the key ethical principles and commitments that govern the Museum and its staff.
Our objective is to achieve best value and the highest professional standards in the procurement of all goods, services and works and our Responsible Procurement Policy and our central procurement function ensures propriety, transparency and compliance with the Museum’s legal obligations and ethical standards. The Museum is committed to procuring goods, services and works without causing harm to others.

The Museum supports the UK Government’s National Action Plan, updated in May 2016, to implement the UN Guiding Principles on Business and Human Rights.

Our spend categories and those that present risks of human rights abuses

The Museum’s principal spend categories are:

- Building maintenance services;
- Construction services;
- Exhibition design and construction services;
- Information technology equipment, software and services;
- Goods for resale in our retail outlets;
- Laboratory equipment, services and consumables;
- Library resources;
- Marketing and publishing services;
- Professional services;
- ‘Soft’ facilities management services (cleaning, catering and security services); and
- Temporary labour (for e.g. front-of-house and retail services).

In 2017-18, the Museum completed a risk assessment exercise to identify ‘high-risk’ spend categories. The principal categories that the Museum deems as carrying higher risks of human rights abuses were identified as garments, electronic equipment and services such as cleaning, catering and security services. In 2020-21 the Museum added construction services, recognising two significant forthcoming construction projects for the Museum.

The Museum deems the corresponding source countries to be as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Countries of Origin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Garments</td>
<td>Bangladesh, China</td>
</tr>
<tr>
<td>Electronic equipment</td>
<td>East Asia, China, India, Eastern Europe, Mexico</td>
</tr>
<tr>
<td>Goods for re-sale</td>
<td>East Asia, China, India</td>
</tr>
<tr>
<td>Construction services</td>
<td>United Kingdom</td>
</tr>
<tr>
<td>Cleaning services</td>
<td>United Kingdom</td>
</tr>
<tr>
<td>Catering services</td>
<td>United Kingdom</td>
</tr>
<tr>
<td>Security services</td>
<td>United Kingdom</td>
</tr>
</tbody>
</table>
Our supply chain due diligence and its effectiveness

In line with developing good practice in public procurement, the Museum follows a risk-based approach to supply chain due diligence. We do this by adopting a tailored approach to mitigating the risk of human rights abuses in each ‘high-risk’ spend category listed above.

Helping eradicate abuses in electronics supply chains: Affiliation to Electronics Watch

In April 2018, the Museum became affiliated to Electronics Watch through an arrangement with London Universities Purchasing Consortium (LUPC). Electronics Watch is an international, non-profit, collaborative organisation of public authorities monitoring global electronics supply chains for human rights abuses. In June 2020, the Museum’s Procurement Manager was elected to Electronics Watch’s Board of Trustees, further demonstrating the Museum’s commitment to ethical public procurement.

During 2019-20, the Museum used LUPC’s collaborative framework agreements that include supplier due diligence and monitoring clauses for the procurement of digital workplace solutions spanning some 1,000 devices. This gave the Museum contractual rights, as part of Electronics Watch, to enter into dialogue with suppliers and collaborate with them to establish due diligence and mitigation strategies to address labour rights risks.

In 2021 and in full compliance with our contract, our supplier duly disclosed the location of factories that had assembled the devices purchased during the previous year, information which the Museum then passed to Electronics Watch. On receipt of a report from an Electronics Watch Monitoring Partner following an audit at a major assembly plant in eastern Europe where many of the Museum’s devices were manufactured, the Museum took action with the supplier to address a non-compliance. In August of that year, and as a direct result of the Museum’s intervention, the supplier undertook to take corrective action to resolve the issue, ensuring that its workers were not exposed to the risk of discrimination.

Working to improve working conditions in garment supply chains and goods for resale: Membership of Sedex

In 2018-19, the Museum joined Sedex, home to one of the world’s largest collaborative platforms for sharing responsible sourcing data on supply chains. It is used by companies, particularly those in the garments industry, to manage their performance around labour rights, health and safety, the environment and business ethics. This helps to mitigate the risk of poor working conditions and human rights abuses for workers employed in manufacturing:

• uniforms worn by our front-of-house and retail staff and also by our contractors’ cleaning, porterage, catering and security staff working in the Museum; and
• goods for resale in our retail outlets.

In 2021-22, the Museum’s retail operation continued to commit suppliers to ethical monitoring through Sedex. No new supplier is engaged unless it commits to joining
Sedex, or its equivalent in the toys and games manufacturing sector, providing additional health and safety protection to customers.

**Reducing the risk to people working in high-risk activities in the Museum**

In 2019-20, the Museum secured from its soft facilities management services contractor a written undertaking that it employs all cleaning and porterage workers directly and will not use third party agencies. This practice virtually eliminates the exposure of workers to the risk of human trafficking. In 2020-21, the Museum’s security services contractor made a similar written undertaking, directly employing all security workers for its daily operations at the Museum.

The risk of labour rights abuses in the supply of temporary labour to UK construction sites is considered to be high. The Museum has selected a preferred contractor for the Urban Nature Project and, subject to government approval, will shortly begin the procurement process to select a principal contractor to build its new centre for science and digitisation. In compliance with the Museum’s Annual Operating Plan and the Cabinet Office’s Procurement Policy Note 06/20, the Museum took important steps during 2021-22 to incorporate contract award criteria designed to mitigate the risks of slavery and human trafficking on its construction sites, as part of its effort to take account of social value in the award of public contracts.

**Training and capacity building**

In 2019-20, the Museum undertook to codify and communicate for wider use in public service those due diligence processes that were found to be the most successful. Since then, the Museum’s Procurement Manager has collaborated with the Business, Human Rights and the Environment Research Group (BHRE) at the University of Greenwich to develop and deliver free online training events on modern slavery in public supply chains to audiences across the wider UK public sector as it prepares for the mandatory publication of annual modern slavery statements.

In 2021-22 the Museum’s Procurement Manager continued to serve on the Home Office Working Group on Modern Slavery in Public Supply Chains. He also led an online training session for National Museums Liverpool and for a group of staff representing universities in Canada.

**Our Goals for 2022-23**

The Museum reconfirms its commitment to better understanding its supply chains and working towards greater transparency and responsibility towards people working on them. We will continue to work with our partners and suppliers to undertake supply chain due diligence and mitigate the risks to human rights in our supply chains.

During the coming year, the Museum aims to collaborate with civil society and non-governmental organisations to implement an effective audit process to protect the labour rights of workers in its UK-based outsourced service supply chains that are employed through third-party agencies.
The Museum also plans to develop and implement a methodology to mitigate the risk of labour rights abuses in the supply chains of its licensed products.

This Statement has been approved and published by the Board of Trustees and will continue to be reviewed at least once annually.
