WSH environmental policy statement

WSH is the parent company of Benugo, provider of catering services to the Natural History Museum.

WSH is the leading independent client service provider in the UK & Ireland, with our head office in Reading and catering contracts throughout the UK & Ireland. Our focus will always be on great service, fresh food, ethical and environmental purchasing and being socially responsible in all we do.

WSH operates a robust Environmental Management System (EMS) accredited to BS EN ISO14001:2004 (EMS Certificate Number 585734).

We understand the impact our business has on the environment and we have identified significant aspects which include but are not limited to:

- Minimising the effects of transport
- Recycling packaging
- Minimising waste
- Efficient use of energy resources and water
- The use of chemicals and ozone depleting substances such as CFC’s.

The management of these significant aspects is documented within our EMS.

This statement lays the foundations for minimising these aspects and provides a framework for setting and reviewing environmental objectives and targets through the EMIT (Environmental Management Implementation Team) monthly meetings, Board sponsor reviews and Board presentations bi-annually.

We will continuously improve environmental performance based on the targets and objectives set by the board. We are committed to minimising the risk of pollution, reducing the level of waste and emissions that arise as a result of the normal day to day business activities of the company.

We are committed to complying with all relevant environmental legislation, regulations and other requirements as they arise. The company recognise that legislative requirements and industry codes of practice are a minimum level of performance and it is the intention of the company to supersede these requirements as a matter of course.

We recognise the importance of training and education of environmental management controls to all employees across our business; it is integral to our EMS that staff understand the impact they have as individuals, and the impact their actions have on the environmental performance of the organisation and indeed the sustainability of the planet itself.

We will monitor our progress and review our environmental performance on an annual basis.

We will undertake ‘greening of the supply chain’ to ensure our suppliers achieve at least minimum standards of environmental performance.
WSH environmental policy statement

We are committed to participate actively in environmental discussion groups through industry associations and initiatives to help raise awareness and improve industry wide performance.

We will communicate this policy statement to all employees via the company intranet and by displaying signed policy statements on notice boards. The policy will also be made available to all via the company website. www.wshlimited.com

This policy will be reviewed annually and updated periodically.
